

Blackjack Brain: A Neurological Perspective on Gambling

Join us for a special look at
Problem Gambling from a neuroscience standpoint
Featuring **Dr. Catherine Williams** of the Office of Addiction Services

Wednesday, April 30, 2014

12:30 PM to 2:30 PM

Temple University
Ritter Hall Room 109

1301 Cecil B. Moore Ave., Philadelphia, PA
Ph: 215-204-6252 email: cspcd@temple.edu

Learning Objectives

- *The neuro-physiology of gambling addiction*
- *The information processing of risk and reward*
- *Hi-jacked pleasure centers*

Participants can attend **in person** at Temple University or participate via **WebEx**.

Participants who attend in person can qualify for 2.0 Social Work Continuing Education Credits.

For those wishing to participate by WebEx, instructions to log in to the Webinar will be emailed to those that register. **Note:** Attendees will be muted upon entry and will be able to participate via written questions. This session will also be taped.
